Education

University of North Carolina at Charlotte

Aug 2022 - Present

Ph.D. Student in Computer Science

Advisor: Dr. Srijan Das

University of North Carolina at Charlotte

Jan 2019 - May 2022

Bachelor of Science in Computer Science, GPA: 4.0

Experience

Salesforce, Palo Alto, CA

Jun 2026 - Present

AI Research Intern - Ambient Intelligence Team

- Advance the teams ambient intelligence mission through the development of a multi-modal egocentric streaming video model

University of North Carolina at Charlotte

Aug 2022 - Present

Research Assistant - Charlotte Vision Lab

- Domain adaption of Vision Language Models (VLMs) through visual probing, enabling adaptation to novel visual domains and preventing catastrophic forgetting of source domains. [2]
- Cross-view (egocentric → exocentric) knowledge transfer in VLMs for enhancing egocentric understanding in exocentric videos. [3]
- Multi-modal (RGB + Human Pose + Human Object Interactions) Large Language Models (LLM) for understanding daily living actions from video. Our approach leverages a curriculum-based training strategy for integrating new modalities into the LLM embedding space. [9]
- Multi-modal (RGB + Human Pose) and viewpoint agnostic Vision Transformers (ViT) for understanding subtle appearance and motion cues in human activity videos. [14]
- Continual learning for robotic control with World Action Models (WAM) [4], depth-aware latent action Vision Language Action models (VLA) [7], multi-modal egocentric representation learning [6], efficient & verifiable long video understanding [5]
- Self-supervised learning and masked autoencoders for training ViTs on small, out-of-domain data distributions. [15]

Sony AI, Tokyo, Japan

Dec 2025 - Mar 2026

AI Research Intern - Multi-modal NLP Team

- Introduced Mixture of Probes (MoP), a multi-modal LLM (MLLM) architecture that learns from privileged training-time modalities and distills their complementary cues to improve single-modality inference. [1]

Honda Research Institute, San Jose, CA

Jun 2024 - Sep 2024

Student Researcher - Perception Team

- View-invariant VLMs for procedural video understanding. View-invariant representations are learned on cross-view videos (ego & exo) and improve performance on single-view videos.
- Learning pose-augmented RGB representations in CNNs for weakly-supervised action and error detection in procedural activity videos.

Inria, Sophia Antipolis, France

Jan 2024 - Jun 2024

Research Intern - STARS Team (Chateaubriand Fellow)

- Multi-modal (RGB + Human Pose) CLIP models for improved zero-shot understanding of daily living activities from video. [12] [10]
- Learnable gating mechanisms to improve feature selection for temporal activity detection.[13]

University of North Carolina at Charlotte

Jul 2021 - Jul 2022

Research Assistant - Data Privacy Lab

- Safeguarding face and iris images from deep-learning based re-identification attacks. [17]
- Created interactive webpage demonstrating safeguards on face and iris images. Try the demo for yourself at <http://3.223.148.187/>. [16]

Patents filed

1. Srijan Das and **Dominick Reilly**. Large Language Vision Model (LLVM), US Patent Application No. 63/693,982 filed on Sep 12, 2024.

Academic Activities

- Reviewer for CVPR 2025, AAAI 2023/24/25

Awards & Achievements

1. CVPR 2025 Travel Award
2. The Chateaubriand Fellowship (awarded by the Embassy of France), 2023
3. Best poster award in Mathematics and Computer Science, UNC Charlotte Undergraduate Research Conference, 2020
